

QA Bug Report – RealWorld / Conduit Application

Environment Note:

- The originally referenced RealWorld demo endpoint was unavailable during testing. Therefore, a working Conduit/RealWorld live demo implementation was used to execute the required QA user-flow validation, including signup, login, content creation, editing, deletion, and logout scenarios.

Application Details:

- **Application Name:** RealWorld / Conduit Demo Application
- **Application URL:** <https://demo.realworld.show/>
- **Type:** Web Application (Demo SaaS-style blogging platform)
- **Purpose:** To simulate a real-world blogging platform with features such as user authentication, article creation, editing, deletion, and user profile management.
- **Testing Method:** Manual QA testing performed on main user flows using the live demo environment.

#	Title / Summary	Steps to Reproduce	Expected vs Actual	Severity	Suspected Cause
1	Password Visibility Toggle Missing	1. Open Sign up page 2. Enter password 3. Observe password field	Expected: Show/Hide password option should be available. Actual: No visibility toggle present.	Low	UI feature not implemented
2	No Validation Message For Empty Login Fields	1. Open Sign in page 2. Leave email & password empty 3. Click "Sign in"	Expected: Validation messages like "Email is required". Actual: No validation message shown.	Low	Frontend validation missing
3	Generic Error Message During Invalid Login	1. Open Sign in page 2. Enter valid email 3. Enter wrong password 4. Click "Sign in"	Expected: Clear error message for incorrect password. Actual: Only "credentials invalid" shown.	Low	Backend error handling not detailed
4	Login Failure After Inactivity	1. Login successfully 2. Wait 10–15 minutes or logout 3. Try login again	Expected: User should log in normally. Actual: Shows "credentials invalid" even for correct credentials.	Medium	Session/token handling issue

5	No Confirmation Popup Before Article Deletion	1. Open article 2. Click "Delete Article"	Expected: Confirmation popup before deletion. Actual: Article deletes immediately.	Medium	Missing confirmation dialog
6	Weak Password Validation During Signup	1. Open Sign up page 2. Enter weak password like "123"	Expected: Strong password rules enforced. Actual: Weak passwords accepted.	Medium	No password strength validation
7	Duplicate Article Titles Allowed	1. Create article with title "QA Demo" 2. Create another same title	Expected: Duplicate titles should be blocked or warned. Actual: Duplicate titles allowed.	Low	No uniqueness constraint
8	No Loading Indicator During Article Publishing	1. Create new article 2. Click "Publish Article"	Expected: Loading spinner should appear. Actual: No loading indicator shown.	Low	Missing UI loader state
9	Loading Text Instead of Spinner	1. Open articles page	Expected: Proper loading spinner animation. Actual: Only plain loading text shown.	Low	UI component not improved
